Allowable Subject Matter

1. Claims 1, 5-9 and 13 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 5 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a distribution server comprising an image data generating unit, a communication unit, a bit rate switching unit, where the image data generating unit inserts monitoring trigger information, which indicates a transmission start time of said second image data fragment, into said first image data fragment and inserts data size information, which indicates a data size of said second image data fragment, into said second data fragment, for executing a receiving bit rate calculation in a receiving side by dividing said data size of said second image data fragment by an interval of time between the start time calculated on said transmission start time and the end time detected based on said data size of said second image data fragment, and said bit rate switching unit controls said image data generating unit to change an image bit rate.

It is noted that the closest prior art Yano (US 20030037158) shows a transmitter receiving a receiver report, and based on that report, calculating a transmission bit rate, and designating a next transmission rate based on the calculated value. However, Yano fails to disclose or render obvious the above underlined limitations as claimed.

Art Unit: 2416

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
